

to Utah Employers

Dear Employers,

Because you hire Utah workers, you realize the importance of having accurate information about the labor market. You may want to know competitive pay rates, budget payroll, or identify job skills that are in demand. Without your contribution, this information wouldn't be available to you. Your response to the Occupational Employment Statistics (OES) Survey makes it possible to publish occupational projections and wage data for over 400 occupations in Utah. This information is used by job seekers, schools and employers like you to make decisions that affect your life. So, when your firm is selected to participate, please remember how critical your data is for knowing what's happening in Utah's labor market. Check out our website www.jobs.utah.gov/wi to view the full results of the most recent OES Survey. Thank you for your help! We couldn't do it without you.

Sincerely,

Lisa Nicholson MeKeel
Lead OES Analyst
